SUMMARY

Master of Applied Finance candidate at SMU (completing January 2027) with a B.Com in Finance & Accountancy and two years of part-time reporting and reconciliation experience. Project work is built on challenging the numbers behind a decision: debt-service and equity-return sensitivities on a power-plant financing, a multi-variable stress of a levered receivables book, a US$1.0bn co-investment tested against its hurdle, and two equity initiations with explicit calls. Methodical, skeptical of an assumption until it is evidenced, and clear in written findings. Bloomberg Market Concepts, Spreadsheet Analysis and ESG certified; CFA Level I candidate (Feb 2027), targeting risk, markets and structured-products roles in Singapore.

EDUCATION

Singapore Management University — Singapore · 2025 – Jan 2027
M.Sc., Applied Finance

Christ University, Bengaluru — India · 2020 – 2024
B.Com., Finance & Accountancy

RISK, SENSITIVITY & MARKET ANALYSIS — COURSEWORK & COMPETITIONS

Vietnam Gas-Fired Power Plant — Financing Memorandum & Coverage Sensitivities ↗ — Project & Infrastructure Financing · SMU · group

- Authored an investment memorandum presented to a mock investment committee (conditional approval, with conditions attached to the risks the memo named); sized the debt and ran debt-service-coverage and equity-return sensitivities across financing and interest-rate scenarios to show where the structure held and where it broke.

Okapi Solar — Receivables Book: Credit, Funding & Scenario Stress ↗ — Specialty Finance · SMU · group

- Restated a solar-leasing startup as a ~5% NIM specialty lender and challenged its **0% expected-credit-loss assumption** (a ~3.4% annual loss rate zeroes pre-tax profit); flagged MYR receivables against unhedged EUR/USD debt and single-facility refinancing risk; reconciled DCF / VC / NSV to a ~US$15–16M EV.

Fujitec Co. (TSE: 6406) — PE Co-Investment Memorandum ↗ — APECS PE Case Competition 2026 · team

- Evaluated a US$1.0bn minority co-investment (~22%) alongside EQT in a take-private on a 3-statement model; recommended **passing at the US$4.1bn ask**: 17.2% IRR / 2.19× against a 20% hurdle, which clears only at ~US$3.5bn EV (20.7% / 2.53×).

Mastercard Inc. (NYSE: MA) — Equity Research Initiation ↗ — Equity Research · SMU · co-authored

- Co-authored an initiation (**STRONG BUY, US$626 12-month target**) over a full 3-statement model: regression beta, 8.46% WACC, 3.2% terminal growth, sensitivity grids on discount rate and growth, EV/EBITDA and P/E cross-checks.

The Walt Disney Co. (NYSE: DIS) — Initiation of Coverage ↗ — Equity Research · SMU · co-authored

- Contributed to a 24-page initiation (**HOLD, US$107 target**): 5-year FCFF DCF at a 9.27% WACC cross-checked against a Sum-of-the-Parts bear/base/bull envelope (US$84 / 107 / 176); every figure sourced to filings, with balance-sheet and cash-flow checks built into the model.

Bank of Singapore — Balance-Sheet Strength as a Client Proposition ↗ — Investment Advisory & Wealth Management · SMU · group

- Analyzed a private bank's External Intermediaries Desk (custody, onboarding, reporting, the split of KYC / AML responsibilities) and recommended an "Asian Gateway" custodian repositioning built on the OCBC ecosystem and Aa1 credit strength.

EXPERIENCE

Jeevan Amrit Food Products Pvt. Ltd. — Financial Analyst (Part-Time) — Bhubaneswar, India · Jun 2022 – Jun 2024

- Reconciled sales registers against invoices and vendor records every month ahead of GST returns and TDS filings; traced each mismatch to its source and kept audit-ready documentation for every filing, two years without a missed statutory deadline.
- Prepared quarterly P&L, balance-sheet and cash-flow statements through the month-end close; ran variance and working-capital reviews in Excel to flag cost overruns ahead of senior review.

SKILLS

Risk & Validation: Scenario and sensitivity analysis (rates, coverage, credit loss, funding cost), stress of modeling assumptions, cash-flow and debt-sizing models, reconciliation and root-cause analysis, audit-ready documentation, written findings for senior review

Finance & Markets: 3-statement modeling, DCF (FCFF), WACC and beta estimation, comparables, financial-statement analysis, descriptive statistics and regression (coursework); economic indicators, fixed income, currencies and equities (Bloomberg Market Concepts)

Tools: Microsoft Excel (advanced: modeling, pivots, lookups, data tables), Bloomberg Terminal, Capital IQ, PowerPoint; Python basics

Other coursework: Home Depot — DCF and comparables valuation · Arrived — real-estate platform case (fee and liquidity structure) · Impaakt — impact-measurement framework assessment, awarded an A.

Certifications: Bloomberg Market Concepts, Spreadsheet Analysis & ESG (Oct 2026) · CFA Level I candidate (Feb 2027) · Advanced Excel — Christ University.

Languages: English & Hindi (fluent) · French (conversational). **Activities:** Finance Club Case Competition, Christ University — 3rd place (2022).

Availability: Immediate, internship or full-time, Singapore; M.Sc. completes January 2027.
